Summary

Detail-oriented recent graduate with a Bachelor's degree in Computer Science. Proven strong problem-solving and communication skills, with a keen ability to collaborate within a team. Eager to apply my technical expertise, internship experience to excel in a Software Developer role.

Education

- Currently pursuing **Bachelor of Technology** at Invertis University (2022–2026), with a overall percentage of **78.45**%.
- Completed Class 12th (UP-BOARD) in 2021 with a score of **84.8**%.
- Completed Class 10th (UP-BOARD) in 2019 with a score of **88.33**%.

Skills

Programming :Java, Python, JavaScript, C
Web Technologies : Node.js, HTML , CSS, Express.js, React.js
Databases :MongoDB, MySQL
Operating Systems : Windows
Developer Tools : Git & Github, Postman, VS Code.

Internship

WebseederTechnologiesPrivate Limited Aug 2025 – Oct 2025
Web Full Stack Intern Certificate Remote

- Developed responsive frontend interfaces with React.js and styled them using Tailwind CSS for a modern user experience.
- Designed and implemented RESTful APIs in Node.js and Express, ensuring secure and scalable backend services.
- Integrated MongoDB for efficient data storage and retrieval, optimized queries to enhance application performance.
- Used Git & GitHub for version control and collaborative development.
- Implemented authentication, state management, and routing, gaining hands-on experience in building production-ready applications.

Code Alpha Oct 2024 – Nov 2024
Software Engineer Trainee Certificate Remote

- Developed Java-based applications.
- Implemented object-oriented programming principles.
- Utilized Git for version control, followed Agile methodologies.
- Optimized SQL queries and database structures to improve system performance and scalability.

Projects

PlantCorner link Jan 2026 – Mar 2026
MongoDB, Express.js, React.js, Node.js, Socket.io, Google Gemini API Individual Project

- A full-stack geolocation-based plant marketplace that connects local buyers and sellers through an interactive map, enabling users to discover, list, and purchase plants nearby with real-time communication and AI-powered botanical assistance.
- Tech Stack: MERN, Leaflet.js for interactive maps, Socket.io for real-time chat, JWT for authentication, Cloudinary for image storage, Google Gemini API for AI assistant, and Vercel + Render for cloud deployment.

Deliciousness link Sep 2025 – Dec 2025
MongoDB, Express.js, React.js, Node.js, Payment Gateway Individual Project

- A full-stack food ordering website that helps small restaurants go online, streamline ordering, and expand their reach to more customers with features like menu browsing, cart management, secure payments, and an intuitive admin dashboard.
- Tech Stack: MERN, Stripe for payments, JWT for authentication, React Context API for state management, and React Router for navigation.

ProductStoreWebsitelink Dec 2024 – Jan 2025
React.js, Tailwind Css, Fake Store Api Individual Project

- Designed a shopping website using React and the Fake Store API to simulate a real-world e-commerce platform.
- Focused on API integration, responsive UI, and state management using the React Context API.
- Implemented dynamic routing with React Router v6 for smooth navigation across pages.
- Styled the application using Tailwind CSS to ensure a clean, mobile-first responsive layout.

Certifications

- Course completion certificate for Object-Oriented Programming using Java by Infosys Springboard. link
- Course completion certificate for Data Structures using Java by Infosys Springboard. link
- Microsoft 365 Copilot – Prompt Writing. link

Achievements

- Solved 200+ DSA problems across LeetCode and GeeksforGeeks.
- Achieved 4 star rating in Java on HackerRank.
